

Rayjoy Carbon Footprint Report.

The purpose of this report is to provide an overview of the carbon footprint of our carpentry company. The report takes into account the direct and indirect impacts that our company has on the environment.

Direct Impacts:

1.

Transport: Our company owns a fleet of vehicles, which are used to transport materials, tools, and personnel to and from job sites. We use diesel fuel in some of our vehicles, which has a high carbon footprint.

2.

Materials: Our company uses a variety of materials for building and carpentry projects, such as wood, plastic, and metal. These materials have different carbon footprints, depending on the source and production processes used.

3.

Waste: Our company produces waste in the form of sawdust, off-cuts, and packaging material. We are committed to reducing the amount of waste produced and recycling what we can.

Indirect Impacts:

1.

Energy: Our company relies on electricity to power our tools and equipment. We use energy efficient equipment and take measures to reduce our energy consumption whenever possible.

2.

Suppliers: Our company relies on suppliers for materials and tools. We are committed to working with suppliers who have sustainable practices and low carbon footprints.
