

Rayjoy Green Procurement Policy

Green procurement policies are designed to minimize the environmental impacts of a company's procurement practices. These policies typically include requirements for suppliers to use environmentally friendly materials, processes, and practices when providing goods and services.

Rayjoy Green Procurement Policy:

1. We will consider environmental criteria when selecting suppliers and evaluate the environmental performance of our suppliers.
2. We will give preference to suppliers who use environmentally-friendly materials, processes, and practices.
3. We will strive to reduce our environmental impacts by working with suppliers to use products and services with reduced environmental impacts.
4. We will strive to develop long-term relationships with suppliers who demonstrate a commitment to environmental sustainability.
5. We will make efforts to reduce the environmental impacts of our procurement activities by minimizing the use of hazardous materials, packaging materials, and transportation costs.
6. We will provide training and education to our staff in green procurement practices.
7. We will ensure that all our suppliers are aware of our green procurement policy and that they adhere to it.
8. We will review our green procurement policy on a regular basis to ensure that we are meeting our environmental goals.
